### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 5-8 are objected to because of the following informalities:

Claim 5, line 3; Claim 6, line 2; Claim 7, line 2; Claim 8, line 3: "more that" is suggested to be changed to --more than--.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Bernhoff et al. (US 2002/0070428).

Bernhoff et al. disclose a semiconductive device comprising a field grading material, wherein the material comprises a polymer based material filled with particles of BaTiO<sub>3</sub>, TiO<sub>2</sub>, Al<sub>2</sub>O<sub>3</sub>, MgO, ZnO or SiC, wherein the particles having a size of 1-100 nm (claim 17, [0037], and [0038]).

The limitations of claim 2 can be found in Bernhoff et al. at paragraph [0038], where it discloses particles having a size of 1-100 nm.

The limitations of claims 3 and 4 can be found in Bernhoff et al. at claim 17 and paragraph [0036], where it discloses particles of BaTiO<sub>3</sub>, TiO<sub>2</sub>, Al<sub>2</sub>O<sub>3</sub>, MgO, ZnO or SiC.

The limitations of claims 5-9 can be found in Bernhoff et al. at claim 17, where it discloses the composition of grading material. Bernhoff's composition would result in substantially the same properties (aspect ratio, form of particles, and volume of the grading material) as the applicant's composition based on the inherency of the combination of polymer-based resin and filler.

. The limitations of claims 10 and 11 can be found in Bernhoff et al. at claim 17, where it discloses the EPDM rubber.

The limitations of claim 12 can be found in Bernhoff et al. at claim 17, where it discloses the device.

The limitations of claim 13 can be found in Bernhoff et al. at paragraphs [0003] and [0041], where it discloses the method for grading an electric field at high power cable terminal.
